PROFILE

Full Stack Developer specializing in building **AI agents into web platforms** — assistants that understand the product, use its data and take real actions for users. 4+ years delivering production systems with **Laravel, Node.js, React and Next.js**: RESTful APIs, admin dashboards, authentication, payments and third-party integrations, from database design through testing and deployment. Shipped platforms for clients in Saudi Arabia, Kuwait and the GCC, and built a complete AI marketing agent end to end on the Anthropic API. B.Eng. in Information Technology Engineering with a specialization in Artificial Intelligence (Damascus University).

CORE EXPERTISE

AI Agents & LLM Integration
In-app assistants, content & planning agents, analysis agents, tool calling, prompt design — Anthropic API

Backend Engineering
PHP/Laravel, Node.js/Express, REST API design, authentication, queues, third-party integrations

Frontend & Web Apps
React, Next.js, JavaScript, Blade — dashboards and responsive product interfaces

Data & Delivery
Database design, query optimization, MySQL/PostgreSQL, testing, Git workflows, Vercel/cPanel deploys

PROFESSIONAL EXPERIENCE

Full Stack Developer · Towards Greatness
Apr 2025 – Present

Saudi Arabia-based company · Remote, full-time contract

- Develop and maintain production web applications with Laravel, Node.js and React, including **Tahkem (tahkem.sa)** — a digital arbitration platform serving users across Saudi Arabia.
- Design and build RESTful APIs, administrative dashboards and authentication systems; model and maintain the application databases behind them.
- Own deployment, testing and debugging across environments, working with a distributed team through Git-based code review and version control.

Stack: Laravel · PHP · Node.js · React · MySQL · REST APIs · Git

Full Stack & AI Developer · Alland Media (Freelance)
Dec 2025 – Jun 2026

ailandmedia.com · Remote

- Built the complete **AI marketing agent** end to end — product architecture, data model, agent workflows, UI and production deployment.
- Designed agent workflows that analyse a business's website to learn its brand and voice, build a content strategy and post plan, and generate on-brand posts.
- Built AI-assisted analysis of reviews and reach so the agent learns from previous results and recommends what to post next.
- Developed the platform with Next.js and Neon (PostgreSQL), integrated the Anthropic API and deployed on Vercel.

Stack: Next.js · React · Anthropic API · Neon (PostgreSQL) · Vercel

Laravel Developer · B-wire
2024 – Feb 2025

- Developed APIs, Blade interfaces and admin dashboards; designed and managed MySQL and SQLite databases.
- Integrated **MyFatoorah** online payments, Firebase, Mailgun transactional email and mobile OTP verification.
- Deployed and maintained projects on Hostinger and cPanel environments.

Stack: Laravel · Blade · MySQL · SQLite · MyFatoorah · Firebase · Mailgun

PROFESSIONAL EXPERIENCE — continued

Freelance Laravel Developer 2022 – 2023

Remote

- Built PHP/Laravel backends and REST APIs powering mobile applications, collaborating with client teams on database design.
- Improved performance through code refactoring and query optimization; wrote unit tests and handled debugging.

Database Designer & Analyst · Eastmed 2021 – 2022

- Gathered requirements and designed data models; developed SQL queries for ETL workflows.
- Optimized queries and indexes and implemented security measures to protect sensitive data.

SELECTED PROJECTS

Alland Media ailandmedia.com

AI marketing agent that learns a brand, plans content, writes posts and analyses reviews and reach to decide what to post next.

Next.js · Anthropic API · PostgreSQL · Vercel

Tahkem tahkem.sa

Digital arbitration platform for Saudi Arabia connecting users with arbitration services, a member directory and case requests.

Laravel · PHP · MySQL · REST APIs

Sour KW sourkw.com

Website for a Kuwaiti facility management and manpower provider — services, staff categories and quote requests.

React · Node.js · Express

Thamrah thamrah.com

E-learning platform for Gulf university students — courses by country, university and subject, with student accounts and a mobile app.

Laravel · PHP · MySQL · JavaScript

TECHNICAL SKILLS

AI & Agents	AI agent design, LLM integration, tool calling, prompt engineering, Anthropic API
Backend	PHP, Laravel, Node.js, Express, REST APIs, authentication, payment & third-party API integrations
Frontend	JavaScript, React, Next.js, Blade, HTML, CSS
Databases	MySQL, PostgreSQL (Neon), SQLite, SQL, database design, query & index optimization, ETL
Tools & Services	Git, GitLab, Vercel, Hostinger, cPanel, Firebase, Mailgun, MyFatoorah
Practices	Unit testing, debugging, refactoring, performance tuning, remote collaboration

EDUCATION & CERTIFICATIONS

B.Eng. Information Technology Engineering — Artificial Intelligence

Damascus University · Graduated Sep 2025

Advanced SQL and Database Analysis — Certificate

English Language Diploma — New Horizon Center

LANGUAGES

Arabic — Native

English — Fluent
